DL3TD  
It was my first DL-DX-RTTY-Contest. Sunday morning I had to replace my 2nd Radio because the rx was deaf. So sorry that I could not copy all DX stations before. But anyway running 1180 RTTY QSOs in 24 h was great fun! See you agn next year in this fine contest. 73 Lothar, DL3TD

DL4PY  
netter Contest, mit der GP war es aber im Vergleich zum ueblichen FB-33-Beam nicht so toll, der Betrieb hielt sich sehr in Grenzen, viel Spass bei der Auswertung

nice contest for me with many German stations

F5RD  
A pleasant contest with many participants. Very good conditions with countries around France on 20 m and 15 m . 268 QSO's but only 14 outside Europe. Thanks to all who worked me. See you again in 2008. F5RD Bernard

G0MTN  
6 hours section - please remove extra QSOs made after this time. I really wish my first 'hours' operation using low dipole would not count. I had much better rates later when I put my antennas up.

G4DBX

My first go at the DL-DX rty contest, condx not very good.

73, Don K0FX

K0LDS  
Lots of fun, wish the band was in better shape for 100w and a vertical...  
See you all next year, it's going to better each year now...

K4GMH  
Thank you for putting on the DL-DX RTTY Contest.  
Had a lot of fun as the bands were okay and great participation.  
Lot of new calls which is especially nice.  
Although the bands were okay, that is not good, some  
of the signals from fellow contesters were very loud.  
ZM2A, on Sunday morning, was as loud as I've heard him on 40 meters.

K4TD  
I just got my station operational on RTTY the day before this contest  
started. I made my "first-ever" RTTY contact about 10 hours before  
the contest began. I was still trying to learn how all the software  
worked, and I decided to give the station a shakedown using the  
contest. All the hardware worked just fine, but I was still finding  
neat "tricks" in the software even after the contest began. I was  
very surprised at how much trouble the software had in extracting  
reports from what seemed to be very "copyable" signals. (NOTE: I've  
been doing CW contests for 30+ years and have gotten quite comfortable  
with extracting exchanges from "very weak" signals). Because of my  
learning curve with the software, I am worried about my "error rate"  
in this contest, but I decided to submit my log anyway. Many thanks  
to each-and-every one of you I worked for my first RTTY contact with  
you. I hope there will be many more QSOs to come. 73, Rick K4TD

KB1CJ  
Awful conditions, but caught New Zealand late at night during a  
short opening on 20M. Also heard NZ briefly early in the morning  
local time.

KB8LFA  
This was my first RTTY contest. I've only made ~ 30 RTTY QSOs  
ever. I had a lot of fun, not top scorer (obviously) but had a  
blast, thanks everyone!

KI4MF  
Great fun folks!

KK5JY  
the last few entries in my log list approximate frequency;  
I'm still looking for a good contest logger.

KS0M  
A good contest. Sorry I had limited time to take part. Of the 74  
contacts, 12 were first time calls. Propagation to EU was poor. I  
will be back next year.

N1KEZ

My first contest!

N5PU  
Had fun!

Club: Potomac Valley Radio Club

W3TUA  
Very nice contest to check out my FSK RTTY setup. The Icom IC-756ProIII is definitely a great RTTY contesting rig. A combination of the Twin Peak Filter and RF control makes for a very quiet band that lets the signals just "pop" out. Used N1MM logger with the MMTTY interface. You can't beat great performance at that price (free). 73 de Korey--W3TUA--Towanda, PA

YV5AAX  
WORKED 6 hours.

ZC4LI  
Thanks to all concerned in running the contest.

ZM2A  
The first 12 hours produced only 80 contacts all bands were closed form ZL. My first sunrise 40m opening to EU was blocked by the OTHR from China. The Radar was still there for the late evening 40m opening to NA but I was able to work a good number of stations through the interference. I enjoyed

the contest - thanks to the DRCG and those I worked.

ZM3R  
Tnx fer Contest !
