F5RD

My sixth DL-DX RTTY and the best. Many stations take part to this  
contest, no long DX, but a lot of european stations on 15 and  
10 m. I enjoyed very much. All my QSO's are in RTTY.  
I tried BPSK31 and 63 on 20 m but nobody call me. It's a great pity !  
Thanks to all who worked me.  
See you again in 2009.  
F5RD Bernard

F6IRF

Casual participation, but managed to reach the B cat. 6 hours time limit.  
Very poor DX conditions, fortunately the E's was there to bring some life  
on the upper bands. Thanks to the DRCG for the nice organisation.

G0ADH

Very enjoyable with quite good conditions  
ON AIR TIMES (UTC)- 1200~1459 = 3HRS  
1730~1914 = 1.75HRS  
0840~0954 = 1.25HRS

GM4FDM

hi GUYS, sorry but couldn't find the correct template in WinTest so I just used the WPX template for serial numbers, obviously it did not score my log correctly. If it is no good - please just use my log as a check log. I must ask Larry and Olivier to include a template for DK-DL.... Thanks for organising the Contest. Conditions were not too good. I have TVI on rtty so no evening operation was possible from home QTH... Nice to meet some of you at Friedrichshafen and hope to be there again next year Very 73 de Tom - GM4FDM  
I want to edit my log to just 6 hours as I believe I am a few minutes over but don't know how - can you help?

GU0SUP

Excellent fun, and nice to see some openings on 10m.  
And it is always a pleasure to work those calls just met in Friedrichshafen too. I look forward to next year now!

HA2MN

I just dropped into the contest to try UCXLog with MMVARI. I had never taken part in RTTY or any other digital contest before so the great activity was amazing and the operation went smooth.  
Many thanks for Qs, see you next year!  
Rig TS-530SP 30 W into a end-fed full wavelength dipole above flat roof

HA5LZ

Many thanks for the super RTTY contest

HA5OMM

Fine contest!

K0FX

Condx poor into the western USA, European sigs weak both 80 ad 40m,  
No signals at all on 10/15/80m, very surprising.  
JA participation seemd low again. Great fun anyway.  
Thanks to the DARC for another good dontest.  
73 - Don, K0FX

K1GU/4

Some early contacts made with call sign K1GU. Correct call should

K4GMH

Thanks for all the contacts. Fifteen showed up with a number of nice European signals. None were exceptionally strong just good copy on most. Twenty was okay when first got on,~1300Z, and seemed to get better later in the day, ~1800Z. Forty was okay until the noise level got bad around 2200Z. Wish I could have spend more time in the Contest or at least at the start of the Contest. However, the weather took care of my plans to operate any more than I did.  
Originally, was suppose to help a friend lower his 40 meter ant. However, the weather was bad and the "ant. party" was called off . The same bad weather took care of trying to operate the first couple of hours of the Contest.  
Around 2300Z another set of storms moved in making the noise level on 40 m so loud that even the "CW operators" deliberate jamming my mark freq. were drowned out! Called it quits as the local weather radar on the internet and showed the storms were going to be around all evening.  
Still had fun for the operating time weather allowed. Again, thanks for all the contacts.  
73,  
Mike, K4GMH

SV1BJW  
Hi to everybody. Was a nice contest . I run for about 8 hours only.  
The reasons are (a) The very high temperatures we have in Athens/Piraeus last three days. The radio room was under 30-37 C during contest. (b) I worked only the higher bands since my MFJ1793 11 mtrs tall Vertical was down on the terrace for repair and maintenance . It will remain there until temperatures in Athens decrease enough permitting to someone work on the top of the building during daytime. From the other hand my mini Ortibeam OB6-3M done very good work on the higher bands. The goal of the day was on 10mtr band . All contacts made without QRN problems. I enjoyed ONE BY ONE my QSOs there. Thats all folks 73+88 U F N = Vasilis
